bodavamshikumar@gmail.com | +91-6302625159 | LinkedIn | GitHub | LeetCode | Warangal, Telangana, India

PROFESSIONAL SUMMARY

Aspiring **Software Engineer** specializing in **full-stack, backend**, and distributed systems, with hands-on experience designing and deploying scalable, cloud-native applications. Skilled in building **RESTful APIs**, real-time systems, and **event-driven microservices** using **Node.js, Express.js, React.js, and AWS**. Strong foundation in **data structures, system design, OOP, and performance optimization**.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Aug 2023 – May 2026

Vaagdevi College of Engineering, Warangal | **CGPA: 8.0/10.0**

Course Work: Data Structures and Algorithms, System Design, OOP, Computer Networks, Operating Systems, DBMS

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, HTML5, CSS3, TailwindCSS, Vite

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT, BullMQ

Databases: MongoDB, PostgreSQL, MySQL, Redis

Cloud and DevOps: Docker, AWS (Amazon S3, ECS Fargate, ECR, IAM), Apache Kafka, Git, GitHub

WORK EXPERIENCE

Software Development Intern – Full Stack | Edunet Foundation

Nov 2024 – Jan 2025

- Contributed to the end-to-end development of a **production-ready full-stack application**; designed **REST APIs**, implemented **JWT authentication**, and developed real-time communication using **Socket.io**.
- Implemented **RBAC**, containerized backend services using **Docker**, optimized **REST APIs** reducing response time by **20%**, and improved frontend load time by **33%** through lazy loading and React memoization.

PROJECTS

Event-Driven Cloud Deployment Platform

GitHub | Live

Node.js, Express.js, React.js, PostgreSQL, Prisma, Apache Kafka, ClickHouse, AWS (ECS Fargate, S3, ECR), Docker, Socket.io, JWT

- Built a **cloud deployment platform** automating Git-based deployments using isolated **Docker** build containers on **AWS ECS Fargate**; stored build artifacts in **Amazon S3** and served applications through dynamic **reverse-proxy** routing.
- Architected an **event-driven deployment pipeline** (**Build Server** → **Apache Kafka** → **API Server** → **ClickHouse**) enabling real-time deployment log streaming via **Socket.io**; secured communication with **TLS/SASL Kafka** and implemented **JWT-based multi-tenant authentication** supporting **concurrent multi-tenant** deployments.

VedaAI – AI-Powered Assessment Platform

GitHub | Live

React.js, TypeScript, Node.js, Express.js, MongoDB, Socket.io, BullMQ, Redis, Groq, Docker

- Engineered an **AI-powered assessment platform** leveraging **Groq LLM APIs**; designed **BullMQ + Redis** asynchronous processing pipelines supporting **30+ concurrent AI jobs** with real-time status updates via **Socket.io**.
- Designed and developed **secure RESTful APIs** with **JWT authentication, RBAC**, and secure file uploads using **Multer**; **Dockerized** the application and deployed a fully typed **React + TypeScript** frontend on Render.

Real-Time Music Streaming Platform

GitHub | Live

React.js, Node.js, Express.js, MongoDB, Socket.io, Clerk Auth, Cloudinary, Docker, GitHub Actions

- Built **RESTful APIs** and **Socket.io** real-time layer supporting live chat, presence tracking, and synchronized playback across **500+ concurrent connections** with **sub-100ms latency**.
- Implemented **Clerk authentication**, role-based admin dashboard, **Cloudinary** media uploads, and automated CI/CD via **Docker** and GitHub Actions.

ACHIEVEMENTS AND CERTIFICATIONS

- HackerRank Campus Ambassador** – Selected to represent HackerRank, promoting coding culture and competitive programming on campus.
- Full-Stack Development Certification** – AICTE | **Python Programming** – Cisco | **MongoDB Atlas Essentials** – MongoDB University
